Transcript

Install Handy Horology Helper from Google Play internal testing or request a TestFlight invite from jospatech.com. Open the app to the welcome carousel.

After the welcome slides, pick Explore with sample collection to tour Harold's demo gallery, or Start with my own piece to add your first watch from the camera.

The Home tab is your Command Center. See how many pieces you own, what's on your wish list, and quick commands for Hunt, Fix clock, Add Watch, and Tools.

Open My Pieces to enter My Museum. Portfolio value and profit tracking sit at the top. Switch between Owned, Wish, and For Sale tabs.

Tap Add to photograph a watch, pick from the catalog, or enter details manually. Each piece stores photos, provenance, service history, and estimated value.
